How do you think Juliane felt at different times during her journey?
Think of one or two of the following. When she:
- was separated from her mum
- was being brought up by other people on a small amount of food and unclean water
- was put on and travelling on the lorry
- saw her mum, jumped off the lorry and hugged her mum again
- boarded the plane
- arrived at school in England
- is having anxiety and panic attacks
- is able to talk to the group at school about how she feels

How do you think Juliane feels now?

How does Juliane’s school help her?

What ideas do you have for ways you could help if you knew Juliane?
